Corrected drawings in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.121(d)) so as not to obstruct any portion of the drawing figures. A grounded system and a power-source-system waveform converting circuit, disposed close to the functional circuit and in the semiconductor integrated circuit and operated on second rated voltage higher than the first rated voltage, converting said voltage fluctuation waveform of the power

source system into an electrical current waveform;

A grounded system and a power-source-system fluctuation waveform output terminal for outputting said electric current waveform obtained by said power-source-system waveform converting circuit outside the semiconductor integrated circuit; and

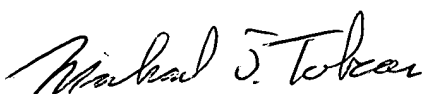

A grounded system and a power-source-system fluctuation waveform output wiring, arranged in the semiconductor integrated circuit, for connecting said power-source-system waveform converting circuit and said power-source-system fluctuation waveform output terminal.
